Jade New Wax

Easy to see details , Low shrinkage for all purposes.

Jade Green New is a premium grade injection wax developed specifically for fine filigree type applications. This colour is **our most popular formulation**. This is formulated to produce wax patterns with a high level of surface finish and very high flexibility.

Physical Properties

Color	Green
R&B Softening points (*C)	70
Injection Temperature (*C)	70
Injection Pressure (PSI)	1-8
Density	0.957
Viscosity (CPS at 78*C)	285
Ash content (%)	0.0396
Hardness (Shore D)	33.5
Linear Shrinkage (at 72*C)	2%
