Super Blue Wax

Suitable for stone in place wax setting , Low shrinkage

Super Blue, The special mixture of wax and plastic is suitable for use with stone in place wax settings. Super Blue is very fluid, excellent for difficult angles, resulting in reduced occurrence of air bubbles.

Physical Properties

Color	Blue
R&B Softening points (*C)	70
Injection Temperature (*C)	70
Injection Pressure (PSI)	1-8
Density	0.940
Viscosity (CPS at 78*C)	275
Ash content (%)	0.0401
Hardness (Shore D)	34.5
Linear Shrinkage (at 72*C)	2%
